If you encounter the error message "That port is already in use" when trying to run the django server:

Stop any other application using the port: First, you need to identify the process or application that is currently using the port 8000. To do this, you can run the following command in the terminal:

```
sudo lsof -i :8000
```

Look for the PID (Process ID) associated with it.

```
sudo kill <PID>
exmp: sudo kill 5583
```

```
sudo kill -9 <PID>
```

```
python3 manage.py runserver 172.24.160.51:8000 -- in ubuntu server
```
